gerardfg.dev github.com/gerardfdzz

Summary

Frontend Engineer with 3+ years of experience building customer-facing web applications using Angular, TypeScript and NgRx. Experienced delivering features within high-traffic booking flows, developing reusable component libraries and contributing to scalable frontend architectures.

Passionate about product development, design systems and transforming ideas into production-ready applications through continuous iteration and user feedback.

Skills

Frontend Development

Angular, TypeScript, JavaScript, HTML, CSS, SCSS

State Management

NgRx, RxJS

Testing

Jasmine, Cypress, TestRail

DevOps & Delivery

Azure DevOps, CI/CD, GitFlow, Vercel

Product & Design

Design Systems, Responsive Design, Accessibility, SEO, Product Discovery

Methodologies

Agile, Scrum, Jira

Experience

Mid Frontend Developer

Jun. 2022 - Present

Capitole | Client: Vueling Airlines

- Developed customer-facing booking flow features used during the flight purchasing journey.
- Delivered enhancements for core ancillary products including seat selection, baggage and priority boarding within Vueling's booking flow, supporting millions of passenger interactions annually.
- Designed and maintained reusable Angular CDK abstractions and frontend components shared across multiple teams.
- Collaborated cross-functionally with product, design and engineering stakeholders to define and deliver business-critical features.
- Contributed to frontend architecture decisions focused on scalability, accessibility and long-term maintainability.
- Supported production deployments, CI/CD processes and continuous platform improvements in an Agile environment.

Previous Roles at Vueling

- Junior CI & RPA (2022–2023)
- Junior Frontend Angular Developer (2022)

Development Intern

Dec. 2021 - Mar. 2022

ISA DATA S.L

Participation in the preparation and integration of multimedia materials into an application, following the instructions of the design team.

Projects

XEIC RUNNERS | Founder & Frontend Developer

xeicrunners.com

- Designed and developed a digital platform for a local running community using Angular 17, TypeScript and Vercel.
- Created a reusable design system with shared components and responsive layouts.
- Implemented SEO, analytics and performance monitoring.
- Reached 349+ unique visitors and 1,000+ page views within the first months after launch.
- Managed the full lifecycle from concept to deployment and continuous improvements.
